

Science Fair Teacher's Information

Dear Mason County Teachers,

It is time again for the Mason County Science & Engineering Fair, sponsored by the Shelton Skookum Rotary Club. We look forward, as always, to participation by a number of students in our local schools and home schooling environments.

The Fair will be held on Saturday, **March 14, 2020** at Oakland Bay Jr. High School. As has been the case for the past few years, applications for participation **MUST** be submitted online at **www.oysterfest.org** by each student who plans to participate. There will be no space available at the Fair for projects not registered online in advance.

The deadline for applications is March 06, 2020. The website will be shut down on **March 06, 2020 and no further applications will be accepted.** Please assure that your students have completed their applications before the deadline.

All students, including both members of team projects must register individually. The exception to this is Class projects, where each student does not need to register.

Complete Rules and further information are being sent to each school. If you have questions, please contact me by email and I will answer as quickly as possible.

Best of luck to you and your students. We look forward to seeing you in March.

Sincerely,

Michael Barnard, MD

Chairman, Mason County Science & Engineering Fair
